HOW IT WORKS

Playtop installs fun and vibrant safety surfacing for playgrounds, sports courts, and walkways.

They source the rubber they use for the impact absorbing base layer from Tyrewise registered processing partners using hundreds of tonnes of used truck tyres every year.

Used rubber surfacing from playground repairs is also returned for processing so it can be chipped and reused by Playtop in their base layers – a truly circular product.

“The establishment of Tyrewise has been a great way for those using used tyres in their products to be recognised and to also raise awareness. It’s great to see the scheme supporting innovation and new ideas and see, what was previously a predominantly waste product, get used in all sorts of ways.”

Andy McDonald, Playtop Owner/Operator
