Auto Stewardship New Zealand Chair's Report	5
Finance, audit and risk committee update	27
Registered scheme Participants by region	40
Forecast vs actual expenses	60

Note:

- EPU stands for a standard measure called the Equivalent Passenger Unit (EPU). An EPU is equivalent to the weight of a 'typical' passenger tyre (9.5kg when new, 8kg at end-of-life)
- ELT stands for End-of-life tyres
- Ministry or the Ministry refers to the Ministry for the Environment unless otherwise stated
- OTR refers to oversized off-the-road tyres
- PSO refers to the product stewardship organisation, Auto Stewardship New Zealand (ASNZ)
- TDP stands for tyre derived product(s)
- TDF stands for tyre derived fuel
- The regulations refer to the *Waste Minimisation (Tyres) Regulations 2023* unless otherwise stated
- The fee refers to the tyre stewardship fee
- WMA refers to the *Waste Minimisation Act 2008*

Auto Stewardship New Zealand Chair's report

Mark Gilbert

I am delighted to report that the Tyrewise Scheme has now completed its fourth milestone, marking one year since operational launch. As previous reports have highlighted, the scheme requires an immense amount of oversight and operational excellence. This report contains a number of statistics that help quantify the efforts of all involved.

This quarter reflects both the progress we've made, and the challenges we continue to address as we scale the scheme nationally.

Performance and Growth

- **Collection and Transport:**
The network expanded to 5,061 locations, including 101 public collection sites, improving accessibility for consumers. We saw a 7% lift in public site volumes and transported 15,139 tonnes of tyres, supported by \$7.48M in payments to transporters.
While this demonstrates strong uptake, managing oversupply and balancing logistics remains a daily challenge.
- **Processing and End Markets:**
10,359 tonnes were processed into tyre-derived fuel and products, with incentive payments exceeding \$3.7M. However, South Island

processing capacity continues to lag, resulting in significant exports. Addressing this gap is critical for reducing transport inefficiencies and building domestic resilience.

- **Financial Stewardship:**
Actual spend for the quarter was \$17.72M, slightly above forecast due to higher transport and processing costs. Governance and delivery costs remain within expectations, and audits confirm strong financial controls.

Performance and Risk Management

Our team conducted 755 site visits, ensuring adherence to the Code of Participation and transparent fee disclosure. Complaints rose to 24, primarily related to Tyre Stewardship fee practices and transporter conduct, but escalations to the Ministry for the Environment dropped significantly, reflecting improved compliance processes.

Market Development and Engagement

The first funding round for the Tyrewise Fund attracted 57 eligible Expressions of Interest, signalling strong interest in R&D, emerging markets, and community projects. Planning for the Round Trip Recycling Summit continues, with a focus on advancing crumb rubber use in roading.

Consumer research shows awareness at 27%, with recycling behaviour up to 40% and positive sentiment among those aware of Tyrewise climbing to 75%.

While these are encouraging trends, we must continue to strengthen communications and support for our partners to amplify the scheme's environmental impact.

Looking Ahead

Our priorities for the next quarter include:

- Expanding South Island processing capacity and OTR solutions.
- Improving app usability and training for participants.
- Advancing market development initiatives to grow domestic demand for tyre-derived products.

Thank you to all participants, partners, and stakeholders for your commitment to making Tyrewise a success. Also to the many customers who are paying the stewardship fee on import or as and when a tyre is replaced (like I did recently), its great that everyone is contributing actively. Together, we are turning waste into opportunity and building a more sustainable future for Aotearoa New Zealand.

Ngā mihi

Mark Gilbert

Chair, Auto Stewardship New Zealand

Objective 1

Transparent and accurate reporting of tyre movements and financial transactions (waste tracking and payment systems)

During the first year of the Tyrewise Scheme, the Scheme Manager will effectively utilise the waste tracking and payment system to:

- a. Provide a high-quality service to users.
- b. Record information about mass balances including materials flow from collection to reuse.
- c. Transparently provide this information to the Ministry and the Public (in aggregated form if required to protect commercially sensitive information).

From 1 September 2024, the Tyrewise Scheme software (waste tracking tool) and payments system will provide information related to the Expected Scheme Effects (see Gazette Notice for General Guidelines for Product Stewardship Schemes for Priority Products Notice 2020 [Gazette Notice 2020]). Relevant information includes Fee usage by the Scheme for incentive payments and other operational payments made to registered participants for ELT collection, transportation, and processing services; volumes of ELTs diverted from landfill for end-use higher up the waste hierarchy; availability/capacity of collection sites across New Zealand, including by location; and clear provision of information about the Scheme, use of funding, and how to access collection sites. More details on these Effects are outlined below in Objectives 2-7. Effects are outlined in Outcomes 1-7, specifically Outcome 1.

Reporting Requirements

- Tyrewise shall report all relevant (non-confidential) information to objectives on their website in a form of their choice as an externally facing public update.
- The Ministry will have a series of reports created for them that they can run at any time to deliver this information in real time.
- Additional information to the 'live' information available via the 'Dashboard' will be reported to the Ministry through quarterly and annual reporting, which will be kept confidential by the Ministry.

Outcome #1 for Objective 1

Effective management of the Waste Tracking System (Tool) and MYOB Advanced (registered parties, Payments System) to ensure uninterrupted, reliable, transparent, and accurate tracking of:

- the use of the Fee by registered parties eligible to receive payments, and
- Mass balances of tyres collected, transported, and processed through the Scheme.

Effective management of the Xero (PSO) payments system) to ensure uninterrupted, reliable, transparent, and accurate tracking of the use of the Fee by non-registered parties eligible to receive payment (such as management and governance costs)

Objective 1 targets for this period

General targets

- Continuous improvements and updates to the Tools
- Tool accurately and consistently recording materials flow (mass balances) by registered participants.
- Payment Systems accurately and consistently recording Fee remitted to contracted registered participants and service providers.

- Quarterly reporting of data collected from the Waste Tracking System Tool.

Specific targets

- e. Payment System(s) accurately recording 99% of all payments.

Reporting on Objective 1

Tyrewise app

App usage

There were 6,099 active user accounts on the Tyrewise app as at 30 September 2025. Active users are those who have permissions enabled to log in to book and/or verify jobs.

Jobs booked for collection

23,100 jobs were created for collection during the reporting period. This includes repeat jobs that automatically regenerate after the previous one was picked up. It only includes jobs that were the first leg of a tyre's journey, not jobs created for collection from consolidation hubs.

Correct app usage

During this period a reminder was sent to app users with low verification rates about their obligations to utilise the app correctly. We also feedback verification rates to each transporter to help them manage their driver performance in this regard.

Improvements to the app

In September, the Tyrewise app and associated services were migrated into Microsoft Azure services. This migration has increased system performance across the board, with some areas of the software now loading up to 10 times faster than before. In addition to improved performance, the service is now automatically scalable, has live performance monitoring, and provides better access to data for the Tyrewise team.

Alongside this migration, there were also around 30 bug fixes or minor improvements made to the Tyrewise software. This matches what was accomplished in the previous quarter. Some bigger updates are planned over the next six months.

Payment systems

Accuracy

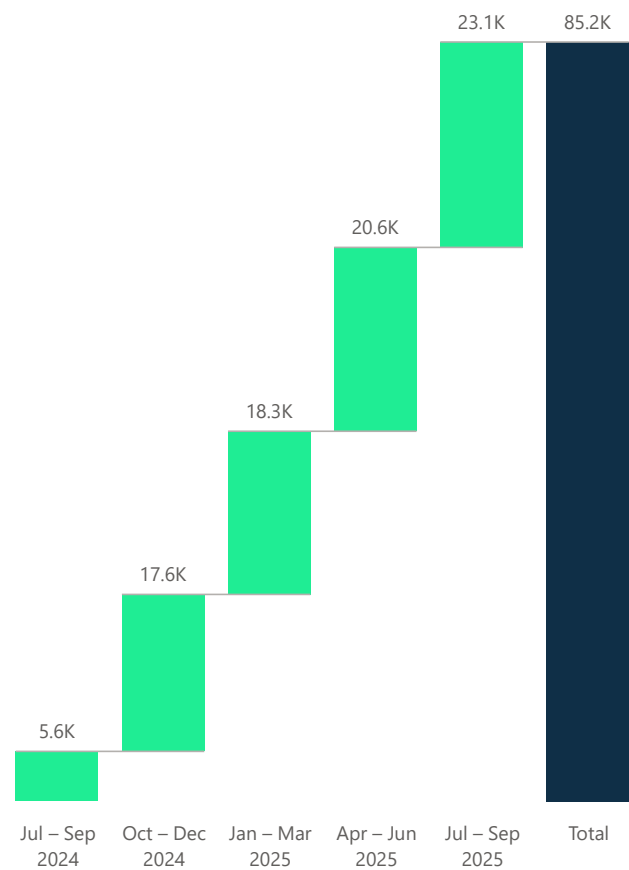

The payments system is the financial services provision to record all outgoing and incoming payments for ASNZ and Tyrewise, and measures payment accuracy of banking batches prepared for payments (correct bank accounts, values and timing). 100% of payments made were accurate.

Improvements

No changes were made to the payments system during this period.

Jobs booked for collection

Based on date created, first leg only

Mass balance data

Mass balance data compares the volume of product entering a market with its eventual outcomes at the end of life.

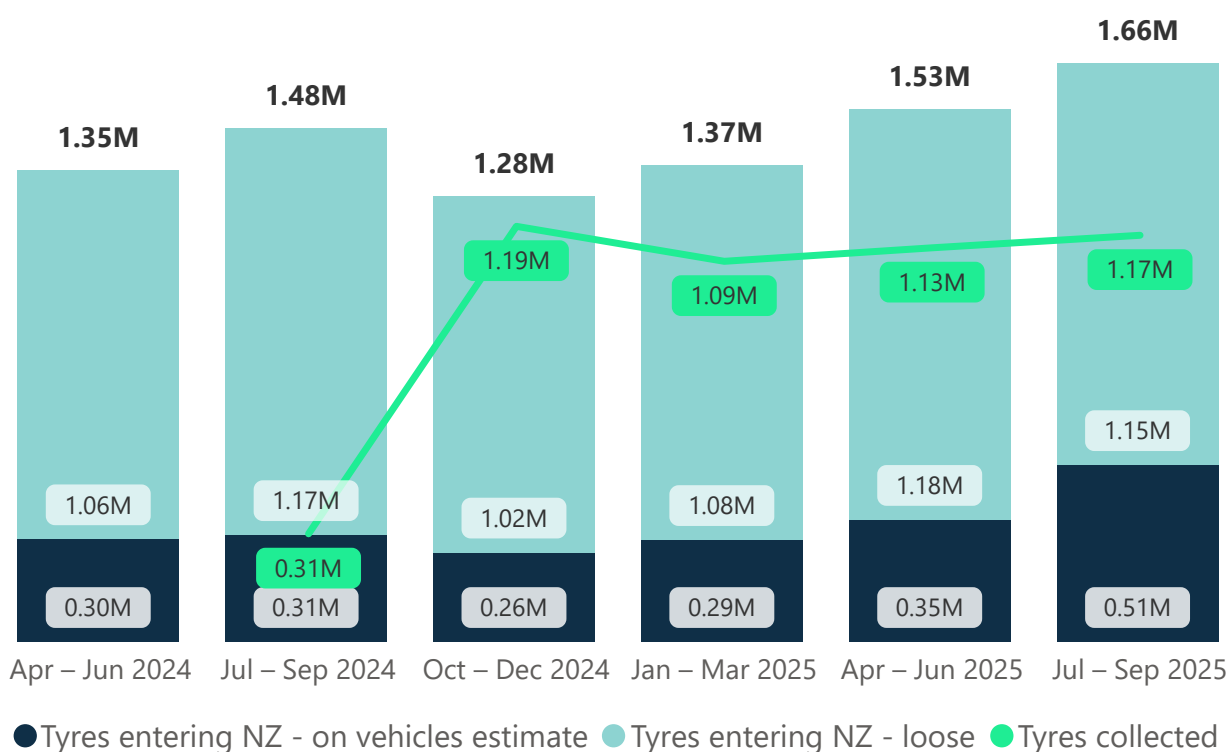

We receive data on imported loose tyres and tyres on registered vehicles entering the market from the Ministry for the Environment. Data for other tyres is from the Tyrewise self-declaration process.

By using the Tyrewise app, we are able to track what happens to end-of-life tyre volumes from their collection through to processing, manufacture into tyre derived products and fuel, or export.

As the scheme continues, more data will accumulate, allowing greater understanding and interpretations of trends over time.

Tyre movements

Number of tyres entering New Zealand compared to end-of-life tyres collected by transporters

Data sources:

Loose tyres entering New Zealand: NZ Customs via Ministry for the Environment, from 1 March 2024.

Tyres entering New Zealand on road registered vehicles: NZTA Waka Kotahi via Ministry for the Environment, from 1 March 2024

Collections: Tyrewise app, based on the verified tyre

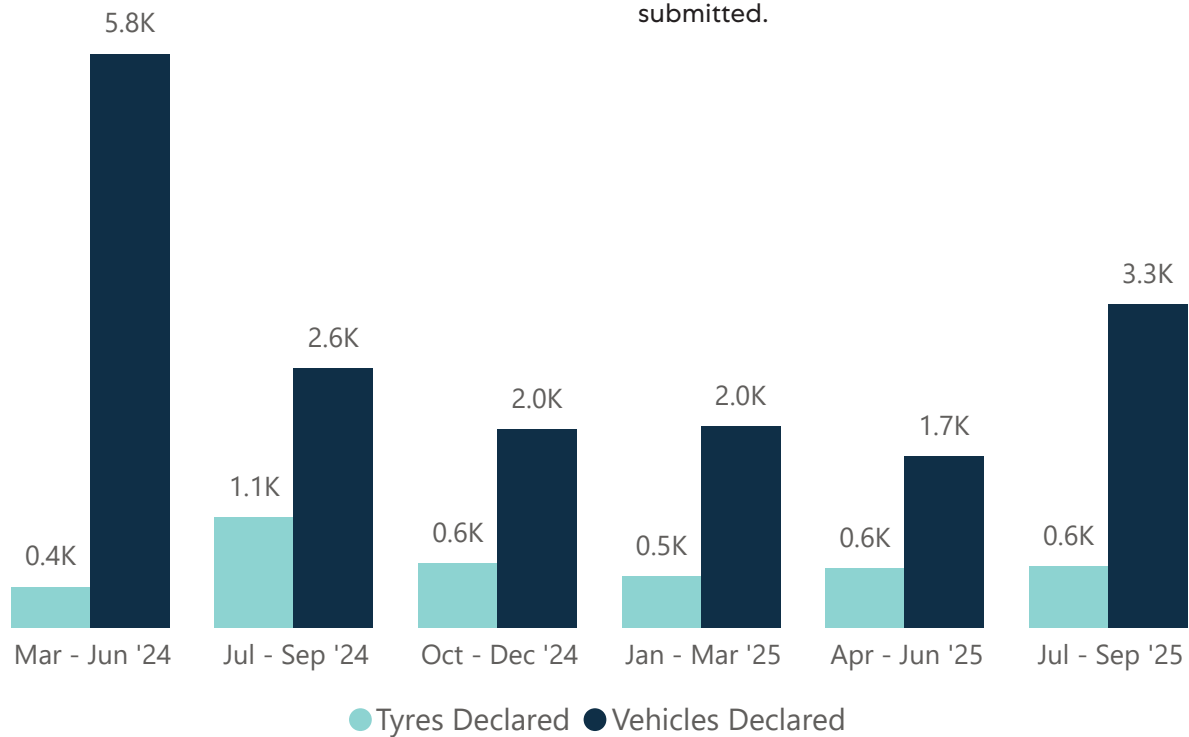

volume at pickup, from 1 September 2024 when end-of-life tyre collections began.

Tyres entering NZ on road registered vehicles is an estimate, as the count of tyres is not recorded for all vehicle types.

Self-declarations

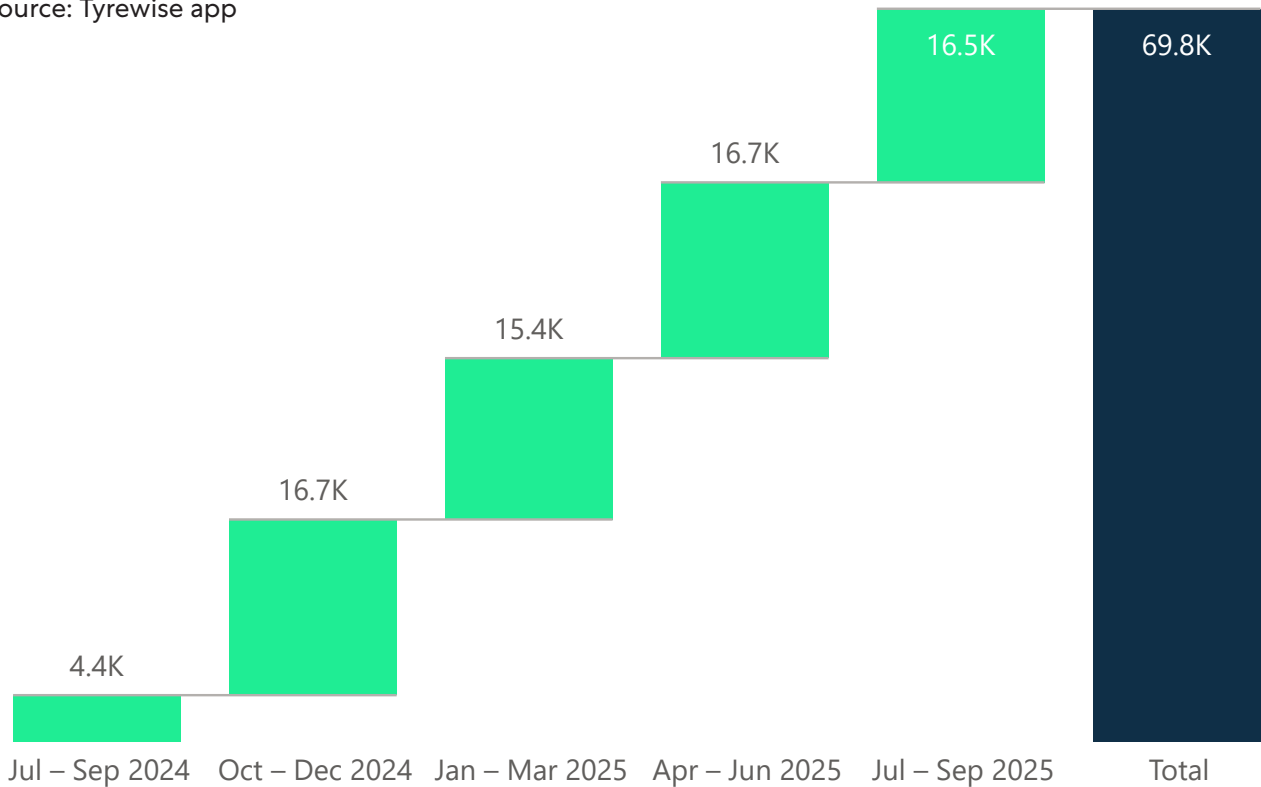

By quarter of import or sale
Source: Tyrewise self declaration form submissions

Number of tyres and vehicles self-declared on importation or sale into New Zealand.
Late self-declarations appear in the declaration period they relate to, not the period during which they were submitted.

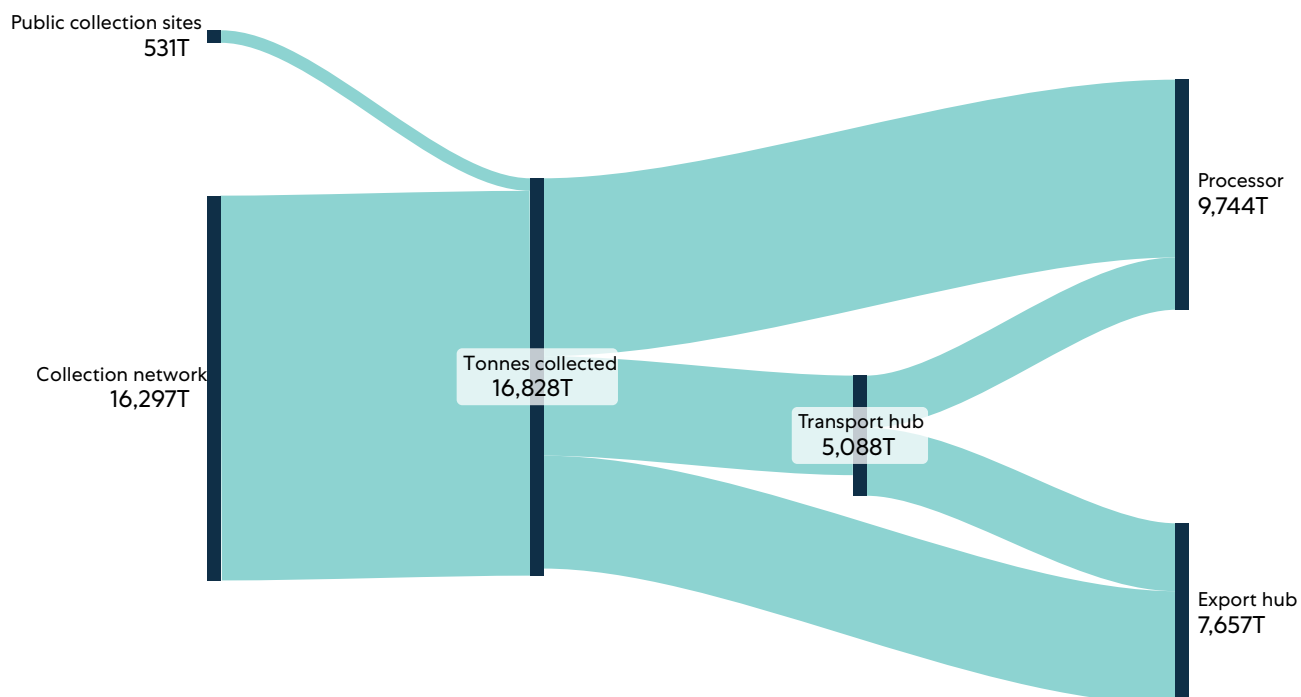

Tonnes of tyres collected

First leg only
Source: Tyrewise app

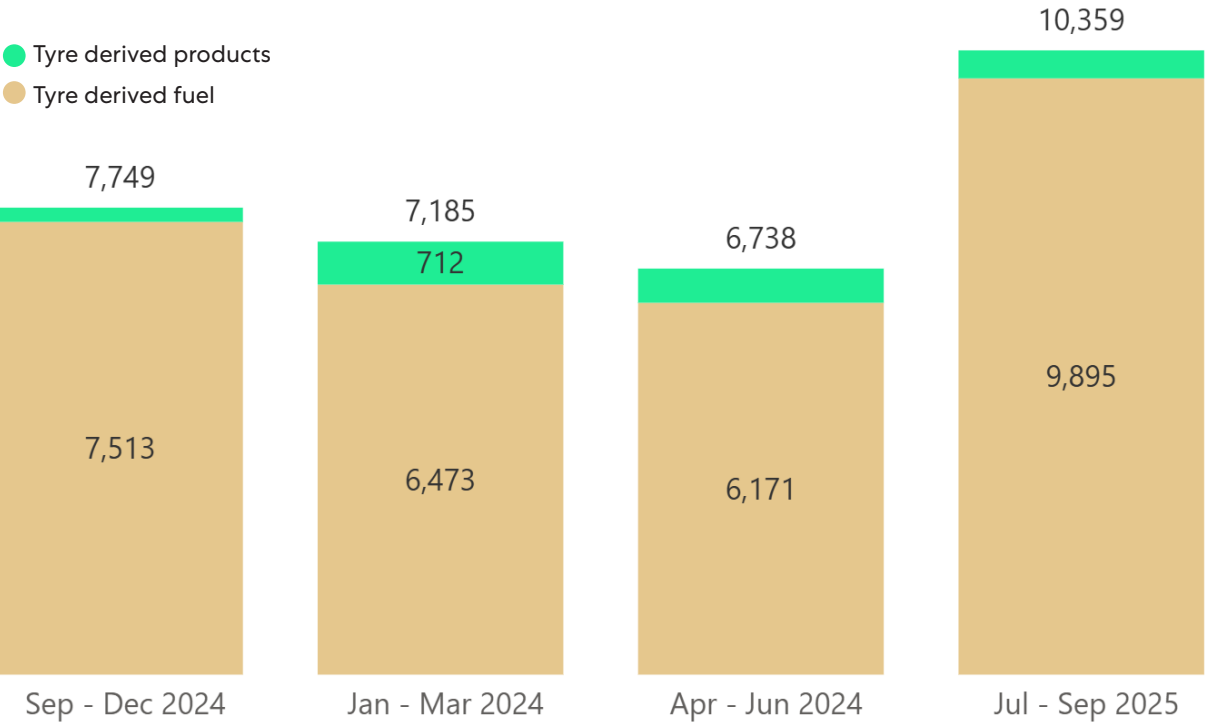

Origin and destination of tyre collections

1 July to 30 September 2025

**Tyre derived products and fuel sold in New Zealand
(tonnes) for which incentives have been paid**

Source: MYOB Acumatica

Objective 2

Transportation - 2 (a) Volumes

From the 1 September 2024 (during the first 7 months of operating the Tyrewise Scheme), registered tyre transporters will transport more than 13,000 tonnes of ELTs via established registered collection network (e.g., tyre retailers, transfer sites and generators) and/or new registered collection services (e.g., community collection centres). Registered tyre transporters will deliver ELTs to registered tyre processors, examples of which include Waste Management's tyre shredder in Auckland, Treadlite shredder in Cambridge and Tyre Collection Services in Christchurch).

Reporting Requirements

- Data on the scheme's tyre transportation services and financial transactions for Fee payments made to tyre transporters will be provided to the Ministry through the waste tracking tool Dashboard, quarterly and annual reporting.

- Data on the performance of transportation services (e.g., availability of transportation services; North Island vs South Island, and transportation networks), will be shared with the Ministry through the waste tracking system, quarterly and annual reporting.

Outcome #2 (a) for Objective 2 (a)

Effective nationwide transportation of tyres to established and new domestic processing end-uses through:

- Contracts with existing transportation services to manage the current demand for ELTs.
- Contracts with new or existing transportation services to manage increases in demand for ELTs as required.

Objective 2 (a) targets for this period

General targets

- Continue identifying gaps in New Zealand's ELT transportation services market.
- Continue executing contracts with transporters. Updated list of contracted participants.
- Quarterly reporting of tyre transportation contracts and volumes.

Specific targets

- Additional 5,000 tonnes of tyres collected and transported to verified domestic end use (23,000 tonnes total).

The financial Model indicated over 12 month operational period 56,000 tonnes of tyres could be available to Tyrewise. A total of 35,500 tonnes could be transported to verified domestic end use in total, the balance exported.

Reporting on Objective 2 (a)

15,139

of tyre collections were paid for during this reporting period

(source: MYOB Acumatica)

Payments and volumes

\$7,479,843 was paid for the transport of 15,139 tonnes of tyres during this period. This includes journeys from hubs.

Performance management

We work with our contracted transporters to improve performance by periodically providing them with their metrics relative to the rest of the market. Metrics for accuracy in collection and verification are obtained from the Tyrewise App.

A key challenge has been managing the oversupply of service to the retail network rather than chasing suppliers for retail collections.

Transport tender process

Initial transport contracts were for 12 months, however these were extended until 30 November 2025, to

ensure there was an adequate window for a new tender process, due diligence and finalisation of contracts.

The tender for new transport contracts opened on 14th July and closed at 12pm 21 August.

We once again appointed NZ Procurement & Probity Services to manage the tender process to maintain an arm's length approach.

In addition to inviting tenders from existing transporters, information was published in our newsletter, on our website and was available on the TenderLink website.

Challenges

Delivering demand to processors as well as managing excess stock for export are a day-to-day challenge that requires the transport network to be nimble and adapt. The Tyrewise Operations team provide support, guidance and direction.

Some challenges remain with correct use of the software for job verification and completion that require improvement to meet the expected level of service and behaviour.

Objective 2

Transportation - 2 (b)

Take-back service (tyre collection network)

From the 1 September 2024 (during the first 7 months of operating the Tyrewise Scheme):

- Public collection services will receive tyres from consumers at up to 5 tyres per visit (typically transfer stations and community collection sites).
- Established services (e.g. tyre retailers, garages, and generators) will receive tyres from their own activities, including retaining end-of-life tyres from their customers.
- This is to provide a free and accessible take-back service. All tyres received by sites providing this service will enter the Scheme via registered transporters (as specified in Objective 2a). The Tyrewise Scheme will quantify the number of tyres received at collection sites for the purposes of:
 - Future market analysis (Objective 5)
 - Identifying and reconciling tyre leakage downstream of collection (refer to Risks and Mitigations).

Effects are outlined in Outcomes 2b and 5

Reporting Requirements

Data on the performance of collection operations (e.g., number of collection sites; North Island vs South Island), will be shared with the Ministry through the waste tracking system, quarterly and annual reporting, including geographical location/distribution of tyres collected.

Outcome #2 (b) for Objective 2 (b)

Free and accessible collection of tyres at registered collection sites (including generators, retailers, transfer stations and community networks) through:

- Contracts with existing collection sites (i.e., retailers) for ELT collection nationwide.
- Contracts with new collection sites (i.e., community transfer stations) ELT collection nationwide.

Objective 2 (b) targets for this period

General targets for outcome #2(b)

- Continue identifying gaps in New Zealand's waste regulated tyre public collection site infrastructure.
- Contracts with public collection sites are established and maintained for actual volume of waste regulated tyres collected over the quarterly period.
- Updated list of contracted public collection sites provided to the Ministry.

- Measure waste regulated tyre volumes collected for future market analysis and identifying waste regulated tyre leakage from scheme.
- Quarterly reporting of public collection sites and volumes.

Specific targets

- N/A

Reporting on Objective 2 (b)

5,061 locations
can book tyre collections

Take back network

There are 4,904 locations that can book tyre collections (excluding public collection sites).

Public collection sites

An additional 13 public collection sites joined the network during this period, making a total of 101. This included two in Hamilton, which closed a significant previous gap.

Public collection network volumes

There was a 7% lift in collection from public collection

sites during this period (531 tonnes vs 495 tonnes).

Gaps in the public collection network

We are in the final stages of contracts to service Gisborne and Wairoa, as well as Rotorua.

Southland region is looking to trial one site within the next quarter, while we have yet to identify a suitable partner site in Dunedin.

Milestone 4: 1 July 2025 - 30 September 2025

Objective 3

Tyre processing volumes

From the 1 September 2024 (during the first 7 months of operating the Tyrewise Scheme), Fee incentive payments will be made to registered tyre processors to support the processing of more than 9,500 tonnes of tyres into tyre-derived products (TDP) or tyre-derived fuel (TDF), and a further 9,000 tonnes of end use/manufactured product derived from TDP/TDF feedstock.

Reporting Requirements

- Evidence of eligible sale (including verified foreign market) of Tyre Derived Product or Tyre Derived Fuel used, will be provided to the Ministry through the waste tracking tool Dashboard and quarterly reporting.
- Data on the number of registered participants receiving incentive payments, the total amount of incentive payments made to registered participants, and an assessment of the effectiveness of the incentive payments on the different processing outcomes (low value vs high value) will be reported to the Ministry through the waste tracking tool Dashboard, quarterly and annual reporting.

Outcome #3 for Objective 3

Nationwide processing services delivered for end-of-life tyres (ELT) by registered scheme processors through:

- established processing services, and
- new processing services that have come online during each quarter.

Incentive payments are dispersed to contracted participants for tyre processing upon evidence of eligible sale, including but not limited to:

- Processed from Feedstock (TDP1, TDP2, TDP3, TDP4)
- Feedstock/Tyre Derived Aggregate (TDF1, TDF1e, TW2, TW6)

Outcome #4 for Objective 3

End Market use of Tyre Derived Product (TDP) used in a secondary process, produced as a result of processing of New Zealand ELT tyres and sold to a verified end market:

- new end market uses by volume; and
- new verified end markets that have come online during that quarter.

Tyre Derived Fuel (TDF), sold to registered end users (e.g., Golden Bay Cement's kiln in Whangārei).

Incentive payments are dispersed to registered processors who sell their products to verified end users (manufacturers) for further use in a process, or to verified end users who can verify what % of the TDP/TDF has been included in their manufactured product. Including but not limited to:

- Processed from Feedstock (TDP1, TDP2, TDP3, TDP4)
- Feedstock/Tyre Derived Aggregate (TDF1, TDF1e, TDF2, TDP6)

Objective 3 targets for this period

General targets outcome 3

- Continue identifying gaps in waste regulated tyre processing capacity to ensure that supply of processed TDF/TDP can meet domestic demand.
- Provide evidence of new contracts for this quarter with registered processors for processing services. Copies are provided to the Ministry.
- Quarterly reporting of waste regulated tyre processing volumes.

Specific targets outcome 3:

- Additional 4,500 tonnes of waste regulated tyres processed (18,500 tonnes total).

Industry sales data of TDF and TDP shows that in a 12-month operating period there is demand for 35,500 tonnes of processed material into the domestic market.

•

General targets outcome 4

- For exported product for use in a secondary process, where the registered processor or transporter exports their product, provide evidence of exporting to a Verified Foreign End Market
- Quarterly reporting of end market volumes sold to registered Manufacturers

Specific targets outcome 4

- Sale of 1,000 tonnes of TDF4 or TDP4 used in a secondary process. Total 11,000 tonnes

Reporting on Objective 3

10,359 tonnes

Claims made and incentives paid for tyre derived fuel and products during this period

54 tonnes

Claims made and incentives paid on for 140 tonnes of this used in manufacture during this period

Changes in processing and manufacture

There were no new processors or manufacturers on-boarded during this reporting period.

We continue to face challenges with a lack of processing capacity in the South Island. This means that a large proportion of the tyres collected there go straight to export.

They can be diverted to North Island end markets as needed, however transporting whole tyres is much less efficient than transporting processed tyres.

Processing for larger OTR tyres is also needed.

As the market develops, we hope to see more of an appetite for investment into South Island and OTR processing capacity.

There was a drop in manufacturing incentive payments this period to 54 tonnes from 140 tonnes in the previous period. This is due to late claims that will be paid during the next quarter.

Exported tyres

During this reporting period a number of claims were finalised that related to earlier reporting periods.

This is largely due to the high standard of documentation required in order to for the scheme to pay costs for handling and transport to port. We anticipate there will be less of lag as exporters become familiar with the documentation required.

Payment of \$653,453 was made for the transport and handling of 13,235 tonnes exported across 577 containers.

Incentive payments

Type	Tonnes	Payment
Tyre derived fuel	9895	\$3,611,686
Tyre derived products	464	\$169,370
Used in manufacture	54	\$3,531

Processors and manufacturers

Company	Tyrewise Subcategory	Plant location
Eco Tyre Recycling	Processor	Manawatū-Whanganui
Golden Bay Cement	Processor	Northland
Golden Bay Cement	Manufacturer (end user)	Northland
Playtop Aotearoa	Manufacturer (end user)	Manawatū-Whanganui
Porous Lane by Watersmart	Manufacturer (end user)	Auckland
Rubber Solutions Asia Pacific Ltd	Manufacturer (end user)	Wellington
Treadlite	Processing	Waikato
Tyrecycle NZ	Processor	Auckland
Waste Management Ltd	Processor	Auckland

Objective 4

Accurate budget estimation, spending and forecasting

Costs of recoverable activities under the Tyrewise Scheme per EPU cannot exceed the Tyre Stewardship Fee set at \$6.65/EPU. By the end of the first year of the Tyrewise scheme, the PSO will report on budget spends to support annual operational costs and develop future annual budgets demonstrating how and where the Fee will be spent in successive years of the scheme. This will support the mission statement of Tyrewise “Improving the value for end-of-life tyres in cost effective and environmentally sound ways” Future budgets shall be formally captured in an annual Variation to be developed towards the end of Year 1.

Reporting Requirements

Information on transactions made for operational payments (i.e., service fees and incentive payments), and internal costs/transactions (i.e., receipt of funds from the Crown to the PSO for payment of contractor fees and overheads) will be provided to the Ministry through the Tyrewise waste tracking and payments system Dashboard, PSO accounting system and quarterly and annual reporting.

Outcome #5(a) for Objective 4

- Accurate forecasting spends of the Fee by PSO towards quarterly operational costs.
- Actual Year 1 budget information to be used to develop budgets for Year 2, in particular spending forecasts for ongoing operational costs, future funding towards R&D and national infrastructure.
- Year 3 budget will be developed using actual budget data from Years 1 and 2, and so on for Years 4-7.

Outcome #5(b) for Objective 4

- Develop an assessment process for applications from parties seeking funding from the Fee.

Objective 4 targets for this period

General targets outcome 5(a)

- All budget spending aligns with true and reasonable financing statements.
- All budget decreases (underspend) and/or increases (overspend) $\pm 15\%$ relative to budget estimates are justified.

Specific targets outcome 5(a)

- N/A

General targets outcome 5(b)

- Completed by M3, summary of applications received, assessed, and approved.

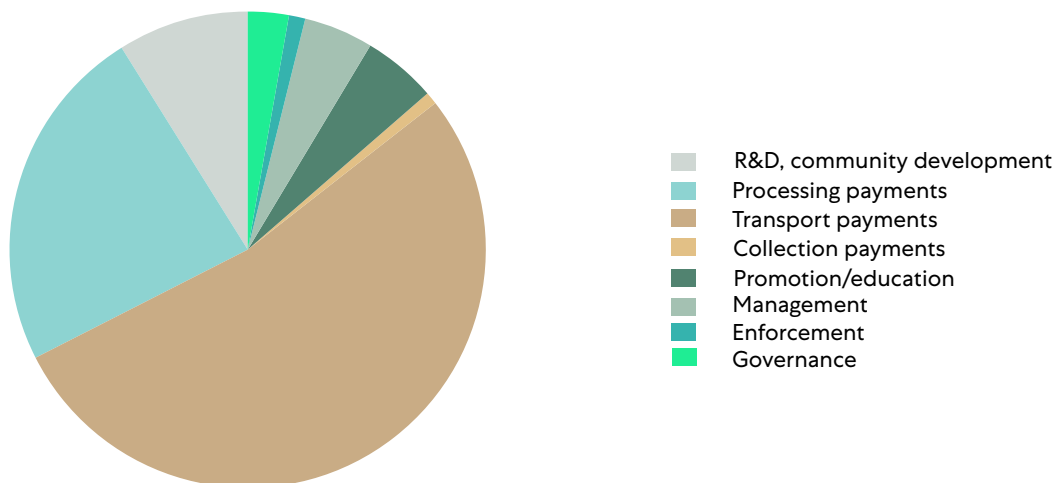

Specific Targets (Outcome 5 (b) for Objective 4

- Completed by M3 Summary of applications received, assessed, and approved.

Spending forecasts vs actual operational to date

Breakdown of projected costs of the scheme per passenger tyre equivalent (EPU) for year 1, as established in July 2023. Forecast vs actual spend can be found on page 60.

Finance, audit & risk committee update

Sturrock Saunders

*Sturrock Saunders, Chair
of the Finance, Audit
and Risk Committee*

It is great to get through our fourth operational quarter of the Tyrewise Scheme, and acknowledge the first full year result. The Finance, Audit and Risk Committee (FARC) continues to provide governance oversight and guidance on financial management, risk and audit processes.

During this period three audits have been undertaken, two by BDO for the MfE (Ministry for the Environment), and one by Crowe, the ASNZ auditor. The Committee has reviewed and presented the findings to the ASNZ Board. While there are no material findings, there are opportunities to further enhance the delivery of the Tyrewise scheme.

During this period, the Committee reviewed and recommended the following to the ASNZ Board for approval:

- The ASNZ Conflicts of Interest Policy
- A comprehensive review of ASNZ's Insurance provider which involved a gap analysis of current policies, service level expectations, and included several broker presentations and indicative 2026 pricing. A new Insurance broker was recommended for appointment.

The Committee also discussed key risk areas including

- Operational risks and governance matters, including
- A presentation by the Scheme Manager on legacy and orphan tyres (risk 3, Operational Delivery Plan) to consider any change to the risk profile. It was agreed to close this risk.

The Committee acknowledges the continued maturity of the scheme, as a result of the diligence, knowledge and understanding of both the 3R Group as Scheme Manager, and Nexia providing accounting support.

I would like to acknowledge the contributions of Committee members, the 3R Scheme Management team, and the ASNZ Trustees for their dedicated support and commitment to the integrity and success of the Tyrewise Scheme.

Objective 5

Market growth and investment strategy

During the first year of the Tyrewise Scheme, ASNZ will work towards the future development (i.e., Years 2+) of a Market Growth and Investment Strategy to ensure that any investments improve upon the national tyre management network. It will detail the proposed expansion of Aotearoa New Zealand's end-of-life tyre market from the status quo to a robust national network and domestic economy.

Year 1 activities include:

- Measurement of baselines to track progress from the status quo.
- All assessments and reports to the Ministry to address how the Recipient plans to use the information collected by the Scheme to continue to grow New Zealand's ELT market, so as to be formally captured in the Market Growth and Investment Strategy in future years of the Scheme's operations.
- ASNZ will receive applications and proposals for market development grants such as R&D grants, community or infrastructure investments, though no grants will be offered in the first year and future grants will be subject to availability of funds collected from the Fee.

Reporting Requirements

- Updates on the measurement of baselines and consideration of the Market Growth and Investment Strategy will be provided to the Ministry through the waste tracking tool Dashboard, quarterly and annual reporting.
- Further development and implementation of the Market Growth and Investment Strategy will feature in future years (Year 1 onwards) Milestone, Outcomes, and Detailed Budgets, as it relates to the Expected Scheme Effects in the Guidelines.

Outcome #6 for Objective 5

Begin developing a Market Growth and Investment Strategy that sets out the expansion of New Zealand's ELT market from what is already established (e.g., status quo) to a robust national network.

New business ventures, small and large, will participate in the scheme to improve its capacity, capability, and geographical presence (including new operations established in the South Island).

Objective 5 targets for this period

General targets

- Report on any material changes to the Market Growth and Investment Strategy.
- Measure potential quarterly growth in the development of the domestic market from the recorded baselines ('status quo')

Specific targets

- N/A

Reporting on Objective 5

Market demand

While processing capacity remains stable, market demand for processed product has been impacted by the general economic downturn.

The market for tyre derived product for use in sports surfaces and equestrian arenas has been well served to date.

The future challenge will be scaling the production and type of tyre derived product in tandem with the development of the roading market.

Market growth and investment strategy

The Tyrewise Fund

From 1 July, Expressions of Interest (EOIs) were invited for funding from the Tyrewise Fund.

61 were received by the deadline of 29 July to be considered in the first funding round.

Of these four were repeats, and were not considered.

The remaining 57 fell into the following categories:

- 24 Research and Development projects
- 18 Emerging Market projects
- 15 Community Development projects

Initial assessment against eligibility criteria and key attributes saw 13 expressions of interest declined.

Further information was requested from two parties, and the remaining 42 were invited to proceed with a formal application.

Applications were split into three funding streams by size:

- Small (\$0-\$50k) 9 EOIs received, 7 invited to proceed
- Medium (\$50-\$250k) 25 EOIs received, 18 invited to proceed
- Large (over \$250k) 23 EOIs received, 17 invited to proceed

Applications will close on 4 October and be assessed by a Tyrewise team before submission to the Tyrewise Grants Committee.

Round Trip Summit

During this period we continued planning for the Round Trip Tyre and Conveyor Belt Recycling Summit with Tyre Stewardship Australia.

Critical to end market development is the roading workshop prior to the main summit. Invited New Zealand participants will hear from Australian and International subject matter experts before workshopping possible approaches to advance crumb rubber in roading here in Aotearoa New Zealand.

Domestic market processing capacity

Capacity	Baseline March 2024*	Target Year Seven**	As at time of reporting (annualised)
Input – Whole Tyre Tonnes	60,860	65,860	87,900***
Processing (TDF/TDP)	31,000	65,201	78,000***
Domestic market sales	36,500	59,274	36,500

* Baseline Mass Balance & Financial Model, July 2023

** ASNZ Service Level Agreement with processors

*** Indicates where current capacity exceeds targets set

Objective 6

Participant awareness / satisfaction

By the end of the first year of the Tyrewise Scheme, a survey (intended to be conducted annually) will be conducted across all registered participants and stakeholders to gauge satisfaction of the services received from or provided to the Tyrewise Scheme (e.g., the waste tracking system, incentive payments). This survey(s) should also clarify the capabilities, sentiment, and make-up of the regulated community.

It is acknowledged that successful development of the Tyrewise Scheme will require financial investment by registered participants and stakeholders which investment will require continuity and certainty of the Scheme.

Reporting Requirements

By the end of the first year of the Tyrewise Scheme initial survey conducted which will cover 6 months of operations (from 1 September 2024 to 28 February 2024).

This will be used to establish a baseline for each community of registered participants.

Details concerning survey(s) will be summarised in an Annual Report to the Ministry, and may include participant performance to overcome challenges, satisfaction of the Scheme, and the range of services provided.

Outcome #7 for Objective 6

Measure user satisfaction and awareness of the Scheme. This will clarify the capabilities, sentiment, and make-up of the regulated community. Users include:

- Registered participants by type/services provided, (i.e., collection, transportation).

- Back-end users of the waste tracking and financial systems, or any other system (i.e., TW staff, software developers, contractors, and administration).

Measurements of user satisfaction and awareness of the scheme include but are not limited to:

- scheme guidelines
- Software and systems (i.e., tracking, and financial system)
- Technical support and call centre
- Contracts/remuneration (i.e., incentive payments rate and service fees)
- Ability to meet obligations under the Scheme and other standards (i.e. NES)

Objective 6 targets for this period

General targets outcome 7

Measure baselines for:

- Over a 12 month period 70% of all registered participants have opportunity to participate in a survey.
- For the scheduled group for this Milestone, measure annual baseline understanding of Scheme guidelines and sentiment, usage of systems, i.e., online portal/application, tracking and financial systems and users' satisfaction with the waste tracking tool.

Scheduled groups are:

1. Public awareness (users of the scheme)
2. Registered Scheme Participants (signed Code of Participation)
3. Contracted Registered Participants (Collection sites, Transporters, Processors and Manufacturers)
4. Stakeholders who use the waste tracking and financial systems.

Specific targets outcome 7

Specific targets:

- Quarterly survey/feedback completed by 40% of scheduled group

Reporting on Objective 6

Satisfaction with transporters

During this period, our field reps started asking about satisfaction with their chosen Tyrewise transporters during their field visits.

When asked to rate their satisfaction level on a scale of 1 (low) to 10 (high), 59% rated their transporter 10. A further 18% rated them 9, and another 18% scored them 8. Only 23% of respondents rated their transporter 7 or under.

These are strong results our transporters can be proud of.

Tyre consumer survey

As tyre buyers pay the tyre stewardship fee, they are an important stakeholder in the scheme and audience for communications. During September, we repeated the consumer research carried out last year by our research partner Kantar. We surveyed 1,011 vehicle owners (excluding those in the automotive industry), 62% of whom had purchased a tyre in the last year.

Awareness

While prompted awareness of the Tyrewise brand is still low (27% of people had heard a little or a lot about it), there was a significant lift in the percentage of

people who say they recycle their tyres - 40%, up from 30% in 2024.

Understanding

Of those aware of Tyrewise, 85% had a correct understanding of the scheme (up six percentage points on last year) and 17% mentioned the fee (an increase of five percentage points on last year).

Sentiment

Two thirds of those aware of the scheme associate Tyrewise with turning waste into opportunity, and over half believe it is making a positive impact in New Zealand. 11% believe its just another revenue generating government scheme, showing we have some way to go with our communications about the scheme's purpose, structure and achievements.

Positivity towards Tyrewise has lifted significantly to 75% this year from 66% last year. Most positive were females, people over 50, and those who fit Kantar's "eco-active" segment based on their attitudes to environmental issues.

Communications effectiveness

Total branded communications awareness has dropped, including in-store when purchasing tyres. More work is needed to help our registered partners communicate about Tyrewise. It might be feel like 'business as usual' for them, but its an opportunity to let their customers know about the positive environmental impact they're having.

Recognition of our advertising campaign, was low, but respondents found it easy understand and felt it communicated its key messages strongly. There was a significant lift in positivity towards Tyrewise from seeing or hearing the campaign compared to last year.

What next?

These results show that our communications are effective, but we need to get them in front of the right audiences at the right time. During the next period we will be focused on making adjustments to the delivery of our advertising campaign and renewing our in-store support material.

What tyre buyers are saying:

"Hopefully will reduce tyres being dumped and provide a useful fully recycled end product."

"i think its a great scheme, its great to see the innovations that NZ is getting better at"

"I think it's a very positive and necessary initiative for environmental protection."

"It makes sense but annoying another cost"

"I think its fine as long as they are recycling the tyres properly"

"I think it is brilliant. Otherwise people dump them on the side of the road, or they get burnt."

"Probably worthwhile, but I don't really know"

Participant communications

Tyrewise app user survey

For the first time, we carried out a survey of Tyrewise app users during this period.

The app is a vital part of tracking tyre volumes and preventing the opportunities for fraud in the system.

However using an app to book and verify jobs, create runsheets and upload photos and weighbridge dockets represents a major change for many businesses who have operated manual systems, and for employees who may not be accustomed to using digital tools.

Registered partners can have multiple app users in their organisations, who can carry out a variety of functions depending on their assigned roles.

Participation in this survey was low - only 175 responses. While this is disappointing, it nevertheless gives us valuable feedback.

42% of respondents had used the app between 5 and 20 times, 17% had used it between 20 and 50 times, and 19% had used it more than 50 times.

85% of respondents were part of an organisation that uses the app to book and verify job pickups.

We asked them how difficult or easy they felt various functions were to carry out on the app. We removed n/a responses before calculating the results.

There was a high level of neutral responses for all functions, and while around half of the respondents found logging in, booking and verifying job pickups easy or very easy, only about a third found finding and viewing jobs or managing users was easy or very easy.

To improve these results, there needs to be multi-pronged approach. We must continue work to improve user experience in the app itself - making it more intuitive for users, as well as provide training support. Although registered partners are responsible for the adequate training of their own employees, such as drivers and admin staff, we can make their job easier by supplying information in a formats that support various abilities and learning styles.

Function	Very easy or easy	Neutral	Difficult or very difficult
Logging in	55%	22%	23%
Booking a job pickup	54%	21%	26%
Verifying a job pickup	48%	15%	37%
Finding or viewing jobs	36%	29%	35%
Adding or managing app users	35%	33%	32%

*number of transporters and processor respondents was too low to show percentages for each function.

What users like and don't like

"Generally user friendly. New user, so still learning my way around the app"

"Gets rid of the need for paperwork"

"I think that there needs to be more training... when there are new facilities... we should be made aware of this and how the added function will benefit our day to day running."

"Somewhat easy to navigate, creating runsheets is easy."

"I like the timeline data against each job. It tells a great story so you can see status of the job and the process it has gone through."

"The search tool is useful."

"As the customers tyre counts can be either well under estimated or over estimated makes it hard to plan a day."

"The spinning wheel of death, takes too long to enter info, then wont upload photos."

"All the information is there."

Objective 7

Site assessments and performance monitoring

During the first year of the Tyrewise Scheme, the Recipient will undertake site assessments of all contracted RPS Scheme Participants (e.g. tyre retailers, collection sites, tyre transporters, and tyre processors). Site assessments will determine whether the participant is meeting the expectations within the Code of Practice to participate in the Tyrewise Scheme and performance monitoring against any contractual agreements entered by participants with the PSO (or its agent) to be receive payments from the Tyrewise Scheme.

All instances of importers or tyre retailers non-compliance of sale of regulated tyres in accordance with the scheme observed or reported to the Scheme Manager will be escalated to the Ministry for appropriate action under the Waste Minimisation Act 2008.

- Instances of observed breaches of the Health and Safety at Work Act and other non-MfE Acts and Regulations should be referred to the relevant Government or local authorities.
- Instances of not operating within the intent of the Code of Practice or other relevant agreements relating to the operation of the scheme will be managed in accordance with the policies and procedures of the scheme.

Reporting Requirements

- During the first six months of the Tyrewise Scheme (1 March 2024 to 31 August 2024), the performance monitoring processes will be firmed up as they are put in place in readiness for operational launch (1 September 2024).
- Scheme Participant assessment findings will be summarised by the Recipient for the Ministry on a quarterly basis as part of the required Milestone Reporting.

- Auto Stewardship New Zealand will notify the Ministry of all instances of potential non-compliance of sale of a regulated tyre in accordance with the scheme under the WMA within 10 days of the non-compliance being detected for the Ministry to investigate further.

Outcome #8 for Objective 7

Establish robust performance monitoring (non-WMA) processes for liable parties and registered participants, and monitor the performance of these processes, including any escalation action from the Scheme Manager to the PSO taken for:

- Liable Parties and Registered participants by type (i.e., what are their performance requirements with the scheme that were breached)
- Mitigation of key risks for the operational delivery (as per risks section)

Note: an example of a 'performance monitoring process' that mitigates key risks might be requiring proof of purchase for tyres collected at the same point of sale (if a retail collection point) to ensure tyre origin or limiting the quantity of tyres accepted at collection sites. Evidence by a public collection site that they are not allowing access to end-of-life tyres to be diverted for re-use.

Outcome #9 for Objective 7

Establish reporting process for WMA non-compliance where liable parties appear to not be selling regulated tyres in accordance with the regulated scheme.

- Escalation to the Ministry of any instances where potential non-compliance with the WMA
- The Ministry may pursue further investigation (audits) and enforcement against offenders using the powers available to the Secretary under ss 87, 88 of the WMA.

Objective 7 targets for this period

General targets outcome #8 for objective 7

- for each type of liable party and contracted registered participant. report on what type of performance monitoring has been undertaken for the period (Code of Participation or Service Level Agreements)
- Maintain robust scheme performance monitoring processes to mitigate risks i.e.
- processes updated as required and reviewed every 18 – 24 months.

Specific targets outcome #8 for objective 7

- Evidence of any random and/or annual field assessments (non-WMA) undertaken in quarter

General targets outcome #9 for objective 7

- MfE notified of any anomalies/non-compliance under the WMA, requiring follow-up audits and potential enforcement actions taken by the Ministry.

Specific targets outcome #9 for objective 7

- Enforcement action undertaken by the Ministry in accordance with the WMA.

Reporting on Objective 7

755

site visits to participants or prospective participants were carried out by our team this quarter

5,299

sites had complete registrations as at 30 Sept.

Does not include sites who have at any stage become unregistered after completion

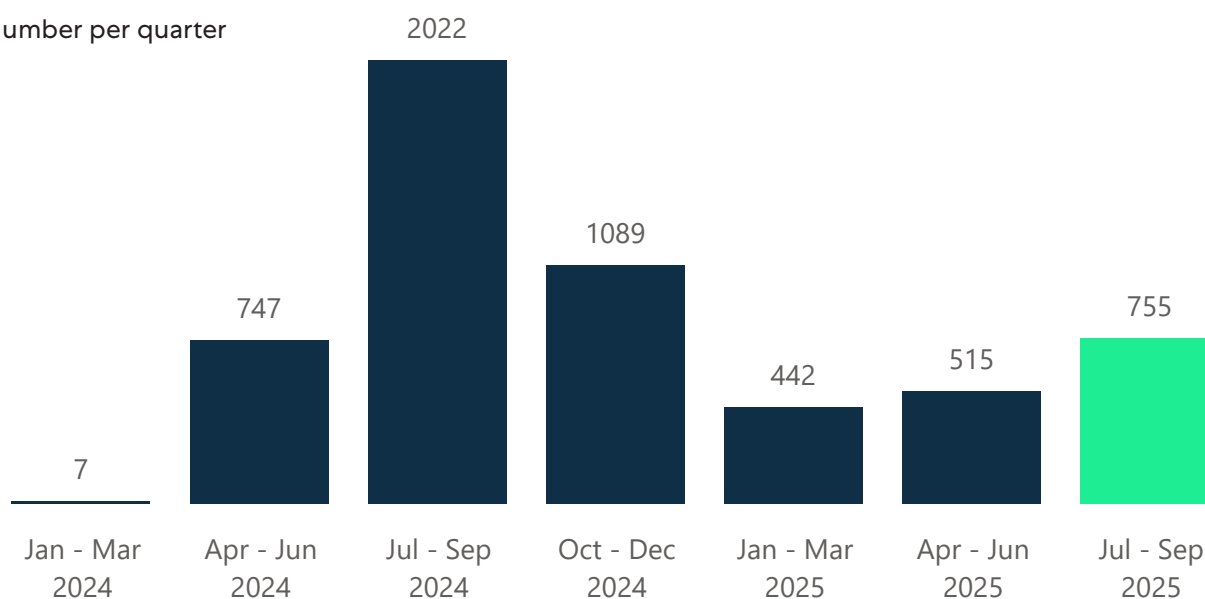

Participant monitoring

During this period, our Tyrewise Field Representatives have conducted 755 site visits across a range of sites, ranging from newly registered sites receiving their first visit, to sites undergoing their second annual follow-up inspection.

During these visits, checks are made to ensure each site has a current Health & Safety Management system in place and are transparently and correctly disclosing the Tyre Stewardship Fee (TSF) to their customers.

Tyrewise field visits

Number per quarter

Checks are also made to ensure there aren't any issues with sites booking tyre collections, and verifying jobs and all site contact details are accurate.

The Reps have discovered some sites are using the term "Tyrewise fee" on their invoices to customers rather than the correct term, Tyre Stewardship Fee (TSF). In such cases, sites are informed of the correct terminology, with many able to make the necessary updates immediately. Sites that aren't able to make immediate changes are given 12 months to do so and are left with a template/example.

The reps have also discovered that a small number of sites aren't charging the correct fee or are charging an additional disposal fee. For these sites along with sites that aren't willing to disclose the Tyre Stewardship Fee transparently, a similar process is followed as above. However, these sites will receive a follow-up visit within three months to ensure compliance. If sites are still not compliant within the allocated period then a final three month period is allocated before the site could be escalated through to the compliance team.

Complaints, breaches of regulations, contracts, or the code of participation

24 matters were logged during this reporting periods, ten of which were complaints. This is an increase from three in the previous reporting period.

Three complaints were about tariffs. One of these was a report of intentional mis-declaration of tyre shipments coming into New Zealand in order to avoid tariffs, which was also sent to Customs, and remains open.

- Three were in relation to charging tyre stewardship fee on go kart tyres, which have now been excluded from the current scheme (based on the definition of a motorised vehicle in the Land Transport Act 1998 - Section 2.
- One was a complaint about a competitor, an international company importing and selling aircraft tyres, who was not registered with Tyrewise

or on-charging the Tyre Stewardship Fee, who is now in the process of becoming registered.

- The final two were in relation to Transporter activity that have turned into compliance issues.

Five of the new matters registered in the past quarter were about transporters. All are considered serious and two were closed within the period – one regarding misrepresentation of Tyrewise in advertised material and one a serious breach of contract that was resolved in response to a letter from the ASNZ Board.

The three that remained open at the end of the reporting period were in relation to the re-selling of tyres collected through the Tyrewise scheme by transporter depot staff, software misuse and the poaching of jobs (unauthorised collection of tyres)

A total of 14 complaints and issues remained open at the end of the reporting period.

Escalation to the Ministry

The number of escalations to MfE decreased from 26 in the last reporting period to 8 in this quarter. All were potential breaches of regulation in relation to the finalisation of Tyrewise registrations. This is largely due to Tyrewise completing the majority of follow-up to delayed registrations.

This quarter's number of escalations is closer to the expected ongoing quantum.

In total, only two escalated matters remained open at the end of the period.

Foreign End Market Verification (FEMV)

Six new applications were received in the quarter, with five of them relating to the withdrawal of two sites from the process that were replaced with a third site for the same broker/end site organisation. Those five applications were at the quiz stage at the end of the period but have since moved to the questionnaire stage.

In addition, a further two sites withdrew from the process in this period (representing a further 5

applications), both owned by the same person in India, who indicated to the auditor that they would like a third site to be verified instead. After the end of the reporting period, an application was received from a NZ exporter for that site (which is not included in this report).

Tyre Stewardship Australia is working through ways to educate sites to ensure only those sites prepared to undertake the full verification process submit applications.

One site (representing four applications) has progressed through to the site visit stage in this period, with the inspection scheduled for late October 2025. This is the final stage before moving to verification.

Two applications at pre-invoice stage at the end of the period have since been denied as they were not contactable over a number of months.

Objective 8

Scheme delivery audits by the Ministry for the Environment

During the first year of the Tyrewise Scheme, the Ministry will undertake 6-monthly audits of the Scheme to determine whether:

- i. the Recipient and the Scheme Manager are each complying with the terms and conditions of the Deed, that Milestones have been delivered successfully, and the Fee has been used as intended.
- ii. the Recipient and the Scheme Manager are each complying with their responsibilities as Operators of the Scheme under the Waste Minimisation (Tyres) Regulations 2023.
- iii. the RPS Scheme Participants are complying with the Waste Minimisation (Tyres) Regulations 2023.

Reporting requirements

- During the first six months of the Tyrewise Scheme from 1 March 2024 to 31 August 2024, the regulators CME compliance processes in draft will be firmed up as they are put in place in readiness for operational launch 1 September 2024.
- The regulators CME team will notify the PSO of any upcoming audits and specific information requirements.
- Details concerning these audits will be summarised in an Annual Report to the Ministry.

Objective 8 targets for this period

- BDO report findings M4 (if any)
- Details of findings M3 addressed (if any)

Schedule of audits

Ref	Audit Type	Scope	Performed By	Cycle	Period Covering	Status
002	PSO	Cyber Audit Scheme Manager	Crowe Australasia	On demand	01 Sept t 31 March 2025	Complete
003	PSO	Audited PSO Financial Statements	Crowe Australasia	Annual	01 Sept to 31 March 2025	Complete
006	Regulator	Financial Audit PSO & Scheme Manager	BDO Wellington Audit Ltd	6 Monthly	1 Sept 2024 to 28 Feb 2025	Complete
007	Regulator	Operational Audit PSO, Scheme Manager, Retailers, Transporters, Processors, Manufacturers	BDO Wellington Audit Ltd	6-monthly	1 Sept to 28 Feb 2025	Complete
010	Regulator	Financial Audit PSO & Scheme Manager	BDO Wellington Audit Ltd	6-monthly	1 March 2025 to 31 August 2025	In Progress
011	Regulator	Operational Audit PSO, Scheme Manager & Retailers, Transporters, Processors & Manufacturers	BDO Wellington Audit Ltd	6-monthly	1 March 2025 to 31 August 2025	Not started

Reporting on Objective 8

Audit activity this period

During this period the Cyber Audit and there audit of the PSO financial statements were completed.

The next six monthly financial audit of the PSO and scheme manager was started, however the next six monthly operational audit is yet to start.

The results and any material issues identified will be included in the Milestone 5 report.

Audit findings and emerging issues

No material issues were identified.

The audited financial statements for the PSO (003) will be published in the annual report.

Registered partners by region (as at 30 June 2025)

Registered partners are liable parties and participants which have had a field or phone visit from our field or service delivery teams, and provided their signed code of participation. All registered partners are listed on www.tyrewise.co.nz
